Creation of PATRICK by Patrick BENETEAU, in Vendée, FRANCE.

Jacques ANQUETIL wins the TOUR DE FRANCE for the 5th time, while Raymond POULIDOR takes the 2nd place.

Walter SPANGHERO wins the 5 NATIONS tournament for the 3rd time, and as a captain of the French rugby team.

Kevin KEEGAN receives his 2nd GOLDEN BALL while playing for Hamburg SV.

Michel PLATINI receives his 3rd GOLDEN BALL trophy. Bernard HINAULT wins the TOUR DE FRANCE for the 5th time. Jahangir KHAN is world champion of squash for the 5th time in a row.

Jean-Pierre PAPIN receives the GOLDEN BALL, and wins the European Cup 2 years later with the Olympic of Marseille.

Philippe ALLIOT is one of the 20 best pilots in the F1 Championship.

PATRICK's rebirth: a new hope for the brand, with the arrival of Charles BENETEAU, the founder's grandson.

Patrick becomes part of the Belgian CORTINA GROUP.

The company keeps evolving, always seeking the next innovation.

REFEREE SHOE

RefereeS11

// Black / Black / Silver 011

NEW

OUTSOLE 1: Soft ground

- For playing on soft and wet soccer fields. This outsole provides the soccer player with good grip on the field and superb shock absorption thanks to the special "Shock Wave System". The 6 removable studs allow the player to adjust this outsole to his personal preferences.
- Deze buitenzool bezorgt de speler voldoende grip op het veld in zachte en natte omstandigheden. Dankzij het speciale "Shock Wave Systeem" is er voldoende schok-absorptie. De 6 afschroefbare studs kunnen in de voorkeurslengte van de speler gehanteerd worden.
- Adaptée aux terrains gras et humides. Cette semelle permet une bonne accroche et est munie d'un système spécial d'absorption de chocs, le "shock wave system". Les 6 crampons amovibles permettent au joueur d'adapter sa semelle en fonction de ses exigences.

OUTSOLE 2: Firm Ground

- This TPU outsole with 13 round studs is the best choice for playing soccer on dry and firm surfaces. The studs divide all pressure equal over the foot surface which lowers the tension in the foot muscles while playing. For extra durability this outsole is stitched to the upper.
- Deze TPU buitenzool met 13 ronde studs is de beste keuze voor een speler op droge en harde terreinen. De studs verdelen op gelijke mate de druk over de ganse zool van de voet en verlichten daardoor de druk op de spieren van de voet. De zool is aan de bovenkant van de schoen genaaid om de kwaliteit te verbeteren.
- Cette semelle TPU munie de 13 crampons représente le meilleur choix pour jouer sur terrains durs et secs. Les crampons permettent une répartition équivalente de la pression sur le pied et diminue la tension des muscles du pied pendant le jeu. Afin d'augmenter la longévité du produit, la semelle est cousue à la tige.

OUTSOLE 3: Traxion

- This TPU Traxion outsole gives the player perfect grip on dry and medium wet soccer fields. This is a light weight high performance outsole ideal for fast actions and special moves during the game.
- Deze TPU traxion buitenzool geeft de speler perfecte grip op droge tot matige natte velden. Het is een lichtgewicht buitenzool met hoge performantie ideaal voor snelle acties en korte bewegingen gedurende het spel.
- Cette semelle TPU donne au joueur une accroche parfaite sur terrains secs ou légèrement humides. C'est une semelle ultra légère haute performance idéale pour des déplacements secs et rapides pendant le jeu.

OUTSOLE 4: Rubber

- This Rubber moulded Traxion outsole is specially developed for free time and leisure playing. Therefore this is also the perfect outsole for kids.
- Deze rubber traxion buitenzool is speciaal ontwikkeld voor vrije tijds-voetbal (minder blessuregevoelig en daardoor ideaal voor jongere spelers).
- Cette semelle traxion en gomme moulée est spécialement conçue pour une utilisation de sports loisirs. C'est aussi la semelle de référence pour les enfants.

OUTSOLE 5: Turf

- This astro turf outsole is a very comfortable light weight outsole with an extra shock absorbing Phylon midsole. Ideal for playing on synthetic grass or very hard and frozen soccer fields.
- Deze astro turf buitenzool is een heel lichte en comfortabele buitenzool met een Phylon tussenzool voor extra schok absorptie. Ideaal om te spelen op kunstgras of harde en bevroren velden.
- Cette semelle "TURF" très légère et confortable permet grâce au "phylon" intégré, d'absorber les chocs. Idéal pour la pratique sur terrains synthétiques, durs ou gelés.

OUTSOLE 6: Indoor

- This light weight Indoor outsole has an extra shock absorbing Phylon midsole, non-marking rubber surface and TPU mid-foot stabilizer. The anti-slip rubber is perfect for short runs and fast moves on a smooth indoor field.
- Deze lichtgewicht indoor zool heeft een extra schok absorberende tussenzool in Phylon, een niet-markerende rubber buitenzool en een versterkende TPU-middenstuk voor extra steun aan de voet. Het anti-slip rubber is perfect voor explosieve lopen en vlugge bewegingen op een effen binnen-veld (of verhard buitenveld of straat).
- Cette semelle "INDOOR", légère et confortable permet grâce au "phylon" intégré, d'absorber les chocs, elle est composée de gomme non-marquante et d'une structure TPU centrale permettant une meilleure stabilité. Idéal pour déplacements courts et rapides en salle.

OUTSOLE 7: Multi Ground

- This outsole can be used for playing soccer on all types of grass fields. If the surface is wet and soft or dry and hard, the player always has a good grip on the field. Extra shock absorption is reassured thanks to the special "Shock Wave System".
- Deze buitenzool kan gebruikt worden om te voetballen op alle types van gras. Of nu het oppervlak nat en zacht is of droog en hard, de speler heeft steeds voldoende grip op het veld. Extra shock absorptie is verzekerd dankzij het speciale "Shock Wave Systeem".
- Cette semelle peut être utilisée sur tous types de surfaces engazonnées (grasses et humides ou sèches et dures). Elle permettra d'avoir une bonne accroche. Elle est également munie d'un système spécial d'absorption de chocs, le "shock wave system".

Technical info

- 1 TPU Heel Counter**
To provide extra heel support for the soccer player and protect him during dangerous game situations (e.g. tackles)
- 2 Soft Top Lining**
For extra comfort of heel and ankle the top lining is soft and flexible.
- 3 High quality Lining material**
The lining material is durable for intense use, soft and breathable for thermal control and comfort of the feet.
- 4 Fold-over Tongue Flap**
For perfect ball control the lace knot is covered with a special fold-over Tongue Flap.
- 5 High quality Nylon Lace**
Extra strong Nylon Laces keeps the shoe tightly closed during the game.
- 6 Extra strong Tongue connection**
The Tongue connection is reinforced on the most critical place for extra durability.
- 7 Durable and flexible upper material**
The upper material is durable, easy to maintain and has great flexibility for perfect ball control.
- 8 PATRICK Insole HEXA Prem**
Special developed premoulded eva insole for perfect fitting, thermal control of the feet and extra shock absorption.
- 9 Outsole (see below)**
For each type of soccer field, for all kinds of weather a special outsole is available. Always providing the player with perfect grip on the field. The outsoles are light weight, flexible and shock absorbing for high comfort and superb performance.
- 10 Double layered High Quality Insole Board**
For extra stability and to provide the soccer player with extra foot support a double layered high quality Insole Board is used.

Shock Wave System

Reinforced by one hundred years of experience, Patrick research and development department along with professional football players under Patrick contract have created the Shock Wave system.
