HOW WE DO LEGEA PRODUCTION

A perfect spherical shape, an accurate trajectory, outstanding durability and soft feel: satisfying all the demands placed on a top-quality ball requires precise manufacturing, advanced technology and superior craftsmanship. At LEGEA, we carry to pass every one of these inspections before we adorn it with the LEGEA logo, a symbol of uncompromising quality

A strengthening fabric, specially developed for our hand-sewn sports ball, is coated with glue

Next, the synthetic leather and the strengthening fabric are glued together tightly

The panels are cut out of using a cutting machine

The quality of each leather panel is checked. A hole for the valve opening is cut into one of the panels

The LEGEA logo and text is printed onto the surface using a special ink

The panels are weighted to determine the weight of the bladder. Super-streight glue prevents the valve opening and the panels from coming apart

The finished ball is weighed

The ball's circumference is carefully measured

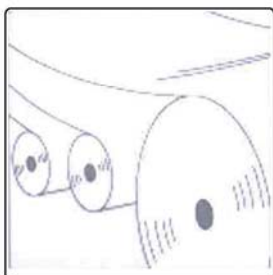

The overall look and feel is checked according to strict criteria

Only balls that pass these tests are allowed to leave the factory

COME AVVIENE LA PRODUZIONE LEGEA

Una figura sferica perfetta, una traiettoria accurata, durata eccezionale e tatto morbido: soddisfano tutte le aspettative racchiuse in un pallone di alta qualità fabbricato con precisione, tecnologicamente avanzato e di superiorità artigianale. Alla LEGEA, accompagniamo il passaggio di ognuno di questi controlli, prima di abbellirlo con il marchio LEGEA, simbolo di qualità indiscussa.

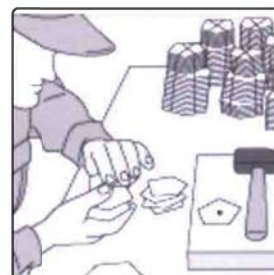

Un tessuto rinforzato, sviluppato specialmente per i nostri palloni cuciti a mano, è rivestito di colla.

In seguito, la pelle sintetica subisce un trattamento che la rende resistente.

I pannelli vengono tagliati utilizzando una tagliatrice.

Si verifica la qualità di ogni pannello in pelle, e si crea un foro in uno dei pannelli per la valvola di apertura.

Il logo LEGEA ed i testi sono stampati sulla superficie con inchiostro speciale.

I pannelli sono pesati per determinare il peso della guaina. Colla super-forte previene che si apra la valvola e si separino i pannelli.

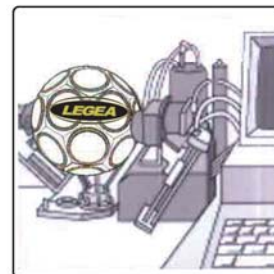

Il pallone terminato viene pesato.

La circonferenza dei palloni è accuratamente misurata.

La forma ed il tatto generale sono verificati da rigorosi test di controllo.

Solo i palloni che superano questo test sono rilasciati dalla fabbrica.
